Lester Snow  
Executive Director  
CalFed Bay/Delta Program  
1416 Ninth Street  
Suite 1155  
Sacramento, CA 95814

Dear Executive Director Snow:

I'm dismayed to hear about some of the proposals in the CalFed Bay/Delta program.

I certainly don't think we should be building any more dams or reservoirs in the near future. We are now seeing the colossal mistakes of constructing many of the dams we already have. I think very significant improvements in efficiency of water use could be made. Agribusiness would like for all of us to pay for something that benefits them but the majority of people do not wish to throw their money away to unrelated big corporations. Furthermore, we need to constantly consider significant, improved flows in our rivers which are necessary to upgrade water quality for wildlife and the surrounding population.

Sincerely,

Chip Carroon
